£295

How wonderful to adapt a rural piece for home interiors. Now cleaned to an as-new-condition it reveals a piece that can be creatively used as a dramatic floor based vase, or perhaps a "home" for walking sticks and umbrellas by your front door.

This robust rustic container is beautifully constructed with a tall cylindrical shape enhanced by an attractive array of artistically knotted bamboo bands, which both decorate and strengthen the build of the piece. It was probably used originally as a grain container.
